Description

We are a Lithuanian sewing company SALVIKA, working since 1996. Our company mostly specializes in two fields: in women's, men's and infants' wear as well as home interior garment production. We provide full service package (from the idea of our client to the readymade garment). We use high quality professional equipment from brands such as YAMATO, PFAFF, MITSUBISHI, DURRKOP, SIRUBA and etc. High technology allows us to work with different kind production and fabrics (silk, cotton, linen, viscose, corduroy, tapestry, wool, leather and etc.). Our merits: projects are completed with precision in a timely manner; we are very well organized – we can make more than 30 different products at the same time; We can produce up to 12.000 garments a month; we also have the experience and capacity to produce eco-friendly garments made from organic fabrics. Our annual production capacity is approx. 100.000 garments. The production we make is distributed in Lithuania and other European Union countries. Professionalism, perfection, quality, consistency, along with learning and development as well as qualified and happy employees represent our strengths that make us the ideal partner. Currently we are looking for new possibilities and new international partners to develop our market.
