**Description**

We are one of the Europe leading breeding farms of mice and rats. Our frozen products are used as a quality food for exotic pets. We are expanding our activities and looking for wholesale and retail partners. We are more than 13 years experienced in breeding rodents for feed-stuffs. Our products have already been evaluated by the exotic animal breeders from the Great Britain, Germany and Norway. So if Your company is looking for: - Extra High quality products; - Competitive prices; - Possibility to purchase rodents from the breeders directly by large amounts and all of the kinds; - High quality service and quick delivery, then EURO-MICE is a right decision. We can offer over 800,000 units of frozen products per month, and this allows us to provide the best terms and the required amounts of production to you.
