## Description

The company "PRO COLORE" was founded in 1991 in accordance with established vision, ideas and faith in success. After years of continuous investment into new technologies, cooperation with scientists from Lithuania and abroad, "PRO COLORE" today is one of leading, innovative manufacturer with specialization in quality emulsion paints, putties, primers, structural plasters, varnishes, oils and impregnators in Baltic region. Cooperation with leading raw material suppliers (as Bayer, BASF, DuPont, Akzo Nobel, OMYA) helped our company to gain customers confidence and provide quality products in line with EU requirements. At this moment we sell products not only in Baltic region, but also to few EU countries (on our brand PRO or private label). Our yearly capacity of products is over 1600 tons per year. At this moment company is looking for more opportunities in foreign markets and searching for partners to start cooperation on developing and producing products on private label.
