Description

We are an international company based in Lithuania specialised in the development, and commercialisation of tech products (tablets, smart watches, bluetooth speakers and earphones, music players, power banks etc.). We are focused to a young audience who are using functional technology products every day and looking for good quality and competitive price. We work with some of the world's most reputable mobile network operators, distributors, retailers and more. Every day we work on improving existing products and creating new ones. A lot of our attention is given to the selection of items and the evaluation of new technology products. In order to provide the best products to the clients, we continuously follow innovations, consult with technology specialists and manufacturers. Your friends from Sponge

Business Line

Consumer electronics

List of products

Tablet computers, smart watches, bluetooth speakers, selfie sticks, mp3 players etc.
