## Description

Emeko JSC is a part of E energija group (a holding of 25 companies [www.e-energija.lt](http://www.e-energija.lt)) with 25 years of experience in energy sector. Emeko runs an advanced metal processing line and specializes in the production of boilers, economisers, chimneys, pressure vessels, tanks, other steel products and metal constructions. The company has 67 employees. Current major export markets are Norway, Sweden, Poland, Belarus and Ukraine. Export share accounts for 60 % of total sales. In-house engineering competence, design capabilities and own technological process assures qualitative production and timely accomplishment of the orders. The location of the production unit in Panevezys (Lithuania) offers convenient delivery conditions throughout Europe and Nordic countries. Partnering in project management with a group company ETC ([www.etc.lt](http://www.etc.lt)), which has experience in „turn-key“ engineering projects, EMEKO provides a full package of services: manufacturing, installation and maintenance.

---

## Business Line

Pressure equipment and technologies

---

## List of products

□ Manufacturing of boilers (up to 40 bar), tanks and pressure vessels; □ Manufacturing of flue gas cleaning equipment, economizers, chimneys, collectors, ash waste containers; □ Equipment for biomass plants (sorting, transportation, storage); □ Metal sheet roll bending, cutting and plasma cutting, metal sheet and pipe welding; □ Steel construction manufacturing (e.g. welding)
