## Description

JSC "Totochemical" was established in 2009. We are the first manufacturers in Lithuania to produce sprayed polyurethane foam. We strive to meet the changing needs of customers, which is dictated by the dynamic and modern world. Intelligent, modern and energy-saving technologies allow for a clean and safe environment and to conserve nature. Particular attention is given to the company communication and collaboration culture. Very great attention to provide the company's staff. Understanding that it's not just big words, we try to develop, expand the horizons of their staff members. In order to create a professional team, working closely with the Riga Technical University Faculty of Chemistry professor who helps the company to progress faster products.
