Description

Orthopedic Company Ortopagalba founded in 2000. Ortopagalba produces elastic medical products in a wide variety: from elastic bandages for knee, wrist, elbow, shoulder, orthopedic belts to complicated corsets for special clients. Each product of our assortment is accredited, certified and conforms to international standards. Large work experience and good equipment let us produce the high quality products, which are popular not only in Lithuania, but also abroad. We are successfully cooperating with a network of pharmacies, sport stores, e-shops for goods of motherhood, safety equipment companies. We also sell our products to individual customers. Ortopagalba actively participates in EU projects. It helps us to renew our technological base, to create new products and improve existing products. The improvement of our activity allows us to meet the need of much more partners in Europe or other countries.

Business Line

Orthopedic products

List of products

Many kinds of soft orthopedic products.
