Description

Granmax, UAB is located close to the stevedoring companies, which carry out most of the fertilizer transshipments in the Port of Klaipėda, in the reserve area of the Port of Klaipėda, next to the railway infrastructure and the largest container terminal in the Port of Klaipėda. The company's main activity is the production of granulated fertilizer (ammonium sulphate). The company has more than 40 employees and an annual production of 250,000 tonnes of granulated fertilizer. A large part of its production is not only transported by sea, but also by road. Granmax, UAB is able to load up to 1,000 tonnes of packaged products onto motor vehicles daily. We are one of the largest ammonium sulphate manufacturers and fertilizer wholesalers in Lithuania.

Business Line
