Description

UAB „NEO GROUP“ is one of the biggest manufacturers of polyethylene terephthalate (PET) granules in Europe, located in Lithuania near the Klaipėda port. Over 308 thousand tons, which compose 12 per cent of the European production, are manufactured and sold during a year. PET is the most ecological and popular material for the packages of drinks and other products and has unique physical features: transparency, strength, lightweight; widely used for recycling. Our clients are the biggest manufacturers of soft drinks, mineral water, beer, domestic chemicals as well as European manufacturers of plastic packages. We produce and deliver to them the highest quality PET material, the trademark of which is NEOPET. UAB „NEO GROUP“ is a member of multinational packaging company – RETAL GROUP, that produces PET preforms, films, HDPE closures, and PET raw material for plastic packaging. The major RETAL GROUP company's clients are international and local producers of non-alcoholic beverages (soft drinks, juice, carbonated drinks, milk) and beer. The companies of RETAL GROUP have their factories based in the European Union, Russia, Ukraine, Kazakhstan, and Georgia.
