Description

UAB ESSPO is a developer, manufacturer and supplier of innovative snow removing and deicing agents based in Anykščiai. The agents developed by us are used to ensure safety in airports and roads in Germany, Poland, Estonia, Latvia, Lithuania and other markets. We are also developing our business in the fields of microbiological oil decontamination and rubber recycling.

List of products

DEICERS Liquid and granulated Nordway deicing agents developed by us for airports, roads or highways. Effective, ready-for-use, environment- and pavement-friendly. -Liquid -Granulated RUBBER PRODUCTS: Recycled tyre-rubber powder processed using a special technology developed by us together with our partners which can be used for production of thermoplastic elastomers, rubberized asphalt, modified bitumen or other products.
