Description

UAB “Klaipėdos kartono tara” was established in December, 2001. The main aspect of the enterprise activities is the trading of gofro cardboard packages, designed for the transportation. The successful trading stimulated to implement a much more serious project: gofro cardboard packages production and selling. UAB “Klaipėdos kartono tara” acquired the gofro carbonate production complex from the AB “Lietuvos tara” branch in 2003, and started producing and selling the 3-5 layers B,C; BB and BC gofro cardboard packages. In 2007, the enterprise realized that using outdated and depreciated equipment it is hard to take roots into the market; therefore, they have chosen the production modernization as their strategic direction. The updated equipment would allow to increase the productivity and to improve the quality, also to minimize the production terms.
