## Description

EPROMA has worked in the field of security technologies yet since 1993. During that time the tradition of the company to take care of its client has been developed constantly. The activity of the company is carried out in Lithuania and abroad. To improve the service of our clients and partners, we established the branch in Vilnius in 2003. In 2009 in Kaunas was opened SECURITY SYSTEM CENTER . It is the biggest security solutions salon in the region. EPROMA is the member of AVG Association (Security Business Group) where it actively participates together with other members in solving the problems related to the development and implementation of the effective security means. Clients and consumers of our services and production are industry companies, construction organisations, projecting companies, supermarkets, hotels, petrol stations, airports and private individuals. The purpose of EPROMA is to offer and implement optimal schemes of the security systems, technical solutions following determinate design standards and high quality requirements. The qualified and certified specialists constantly improving their skills and knowledge in Lithuania and abroad. This helps to ensure reliable security of people, buildings and property. The latest technical-technological equipment and devices of projecting, installing and work control used by EPROMA allow to guarantee the required quality of the services. This is passed by the certificate No.1406 of the Lithuanian Ministry of Environment, providing the right to accomplish various works of alarm systems, projecting and installing in the special purpose objects. EPROMA collaborates with companies such as INIM, Dahua, Smart Cabling & Transmission, Prospecta Cables, DSC, ID Teck, The Fire Beam, NTI, Forteza, SAS security alarm services, Ritar, Trikidis.

---
