Description

“Manilla” natural cosmetics brand, product of the year 2017 winner, founded by a doctor, who created all the products based on scientific facts – proven medical researches and recommendations. We are proud to introduce the best active substances combinations made from natural ingredients. Our products are created with the highest quality and mostly ecological ingredients. Cold-pressed oils, aloe vera juice and floral water are the base of our cosmetics. Few effective formulas were invented in our laboratory for different skin types and anti-aging purposes including active, healing substances, such as hyaluronic acid, coenzyme Q10, collagen, different vitamins, anti-oxidants and other various ingredients. To combine all the ingredients and for silky consistency we use natural emulsifying wax from olives. “Manilla” – award winning, natural and hand-made skin care products brand created by a doctor.
