Description

Medicinos linija UAB is manufacturer of innovative dental products here in Lithuania. Our trade name i-dental is synonym of good quality and price ratio. Our company is one of the few medical device manufacturing companies in Baltic area and one of the leading dental brand in Eastern Europe. Our most important success factor is and remains "good quality - reasonable price". Innovation is a key factor for us in developing our products. Quality assurance has top priority in our company and is integral part of each stage in the manufacturing process. We realize that our success as a dental manufacturer depends on our dealer success and we are very proud of our dealers in more than 80 countries worldwide.
