Description

UAB MOGEMAS has executed its production activities since 1995 and it is the only manufacturer of iron of animal origin and food supplements containing it in Lithuania. According to its standard, the Company now manufactures seven kinds of hematogens fortified with different vitamins and other valuable additives that meet all the requirements of the European Union. There is HACCP Food Safety System introduced in the Company, it holds a veterinary approval number 82-04. In 2007, the food supplement „Hema2gen“ was recognized as the Product-of-the-Year of Lithuania and was awarded the gold medal by the Lithuanian Confederation of Industrialists. Food supplements of UAB MOGEMAS are well-known and well-liked by consumers, and this induces constant search for new formulas.
