## Description

Engrave.It company was founded in 2009 in Vilnius, Lithuania. The main activity - different materials cutting and engraving by laser. Qualitatively carrying out orders, the company has gained much experience in difficult situations and has earned the trust of many Baltic and Scandinavian companies. Establish strong relationships with regular customers. We carry out various advertising, design and other types of projects. To engrave and cut various material. We use 80 Watts (CO2) laser, a working area of 900 x 600 mm and 60 W gas laser, a working area of 960 x 460 mm. We use only high-quality materials which usually we have in stock. In case of larger orders we carry out the design and preparation of drawings for free. We offer high quality at a reasonable price. We are full of new ideas, so we always find a solution at every situation. We provide parcel shipping services in all EU countries and Worldwide as well.
