## Description

"Nando" is a biotechnology company that develops and manufactures high-added-value microbiological products and chemical additives for agriculture and industry. Through innovation, combining scientific advances in biotechnology, chemistry and engineering, the company develops and markets biostimulants, surfactants and chemical products for use in crop and livestock production and in various industries. With one of the largest R&D (research and experimental development) centers in Northern Europe, and in collaboration with research centers and universities worldwide, "Nando" has developed a portfolio of over 50 specialized products: Bacteria, fungi and other biostimulants for plant growth enhancement and residue degradation; Microbiological and technological solutions for seed and fertilizer producers; Surfactants to improve the potential of plant protection products and fertilizers and the efficiency of the mixtures used; Manure management, composting, microclimate improvement and other solutions for livestock production; Wastewater, waste and environmental improvement solutions for industry. The company's most popular microbiological products are "BioNPKPowderS", "BioTero", "Bio Spektrum" and "Bio Splito". In the surfactant category, the best-known are "PeriPlus Leaf", "pH Water Power", "Foamex", "Smart Contact" and "Lignum". "Nando", established in 2007 is today the leader in its field in the ES and is actively developing its export expansion. The company's products are distributed and researched in more than 30 countries in Europe, Africa, the Middle East and South America. "Nando" aims to become a global biotechnology innovator, with solutions that create economic benefits and sustainability in all sectors of agriculture and industrial applications.

---

## Business Line

Functional agriculture additives

---

## List of products

Adjuvants, Biostimulants, Biological soil improvers.
