Description

Community of Life and Work The Atelier of Treasures is an NGO that started in Lithuania in 2013. It is based on the values of l'Arche community and aims to celebrate life and provide meaningful occupational opportunity for people with special needs - adults with mental disability. The carpenter, social worker, volunteers and ten differently abled adults work together. We meet five days a week to learn new skills, craft wooden items, make new friendships and do many other things that bring more joy to life. We make various wooden household items, including coat racks, key rings, puzzles, tables, shelves, window trims, prayer benches, etc. We gladly accept custom orders
