Description

"Nord Organics" – high quality organic fertilizers with "Plant Probiotic"; "Agro Probiotic" and "Soil Probiotic" trademarks', producer working in the field since 2007. Products are produced from Lithuanian sapropel and peat and are fully suitable for home users and agriculture professionals. The main "Nord Organics" MISSION – to provide production to the market, which will help to create long term agriculture foundation and IMPROVE SOIL QUALITY. Also, by reducing production costs increase soil productivity, INCREASE HARVEST QUALITY and QUANTITY. "Nord Organics" is aiming to spread the awareness of increasing agricultural problems, change attitude to workable soil and farm responsibly. By understanding present problems and threats to agricultural, gardening, horticulture sectors we CLOSELY COOPERATE with SCIENCE AND RESEARCH CENTRES, that directly participate in our product development and testing processes.

Business Line

Organic fertilisers

List of products

SAPROPEL – natural organic raw material, which formed on the bottom of some freshwater lakes during thousand years out of flora and fauna origin remains. We specialise in sapropel based organic fertilisers for hobby, professional and industrial users. For more information please take a look into attached file.
