Description

TRANSVENTA SOLAR UAB specializes in solar power plant installation, their projects management and implementation processes. We encourage our partners and clients to use the renewable energy sources in Lithuania and abroad. Our experts could offer you a complete package of services: installation of the different size and power solar power plants (at your home, farm or office), full range of consultment, provides the materials for power plants installation, gives the guarantees for their work and provides the post warrant services. Our main advantages comparing to competitors are both our trustworthy, strong partners and tremendous experience in solar power plants installations achieved by working here in Lithuania and also in Germany. We are proud of being able to guarantee the high quality of works for the reasonable price!
