Description

We are a family owned knitting company UAB "EGNIZITA" (Ltd) from Lithuania. Our company works on modeling and manufacturing of linen and wool clothes for both women and men. All our products are knitted using only hand-knitting machines. All accessories are also usually made by hand. Knitting patterns that we use for our garment can be borrowed from the old ancient times or can be new and modern. All parts of our products are knitted separately, instead cut from a single knitted material. That is appreciated by our customers. All yarn that we use for knitting (linen, cotton, wool) are 100% organic and natural and have international quality certificates. Buttons are also natural and made from cattle horns or wood. Long experience and has helped to achieve customers satisfaction in many countries world-wide. The new models and the best models of our previous collections are always waiting for You... We work for You with joy and our products' labels say: "Made in Lithuania with Love for Your Comfort and Joy" ... As we can knit different linen and woollen clothes of your drawings or sketches. We want to find partners in World-wide market. We look for trade partners, representatives, agents, boutiques owners...
