Description

Kardiolita is the leading private general hospital in Lithuania. Established in 1998 Kardiolita provides full range of medical services - from comprehensive diagnostics to various surgical treatments within many medical areas. Kardiolita employs 190 highly qualified Lithuanian doctors with extensive international experience and treatment performance of more than 45 medical areas. The Hospital is equipped with cutting-edge medical equipment and laboratory, employs the most advanced and effective methods for diagnostics and treatment. Kardiolita possesses out-patient department, 3 modern operating rooms, a 24-hour intensive care unit (12 beds), in-patient department with cosy wards (single, double, family, luxury - 44 beds in total). Kardiolita has long-term experience in treating international patients. Our mission is to provide personalized care of outstanding quality that makes a difference to the typical hospital experience!
