Description

At Elseta talented software and electronics designers develop cutting-edge products. Our focus on two markets Industrial automation process digitalization and Energy management including distributed renewable energy and energy management systems for factories and buildings. Elseta's team enjoys projects that require close collaboration with our clients to understand the particular challenges you might face. Our biggest strength is, therefore, our ability to provide best-tailored products and platform for each client. Let's talk about our solutions to your problems – info@elseta.com

Business Line

Industrial automation

List of products

* Sensors, * Gateways, * Datalogers, * Data collection middleware, * Monitoring systems.
