Description

Žilinskis Co is an infrastructure engineering company which has more than 25 years of experience in the design and construction of various infrastructure objects: power lines and substations, roads and streets, water-supply and sewage-collection networks and sewage plants, city squares and recreation areas, and public-purpose buildings. We are also providing electrical cables and other electrotechnical products in Europe, Africa and Asia. We have more than 400 highly educated specialists, of which more than 80 per cent are engineers, committed to delivering you the highest standards of Safety, Quality, Environmental and Project Management practices. We have a firm financial standing and assume full responsibility for our work. Our company resources allow us to complete projects worth tens of millions of euro's. Services: CONSTRUCTION AND DESIGN OF POWER LINES AND TRANSFORMER SUBSTATIONS (HV AND MV).

Business Line
