Description

In 2013 a group of Lithuanian biotech engineers founded “Bioversio” – a modern laboratory that develops and produces effective, environmentally friendly and high return biological preparations for crops and provides innovative environmental solutions. Our uniqueness BIOVERSIO products are designed with a view to contemporary business. We combine scientific knowledge with nature’s potential to meet the challenges of efficient and environmentally-friendly biotechnological solutions. We work in a way that you do not have to sacrifice one advantage over the other – BIOVERSIO products are affordable with rapid rates of return, harmless to people and the environment.

Business Line

Biotechnologies for oil industry and agriculture

List of products

OIL CONTAMINATION TREATMENT We use selected microorganisms which decompose oil contamination into harmless substances. **MICROORGANISMS FOR AGRICULTURE**
