Description

The very main objective of OPTOMAN is in house manufacturing of high-quality thin film coatings and laser optics, where we employ advanced ion-beam sputtering technology. These coatings and components are optimized for laser applications, where requirements for quality, performance stability and etc. are extremely high. Application optimized custom laser optics for: • DPSS lasers, • Ultrafast lasers, • Medical laser systems, • Multi kW laser systems, • Research and Development.

Business Line

Laser Optics

List of products

• Laser Line Mirrors, • Broadband Mirrors, • Ultrafast Mirrors, • Thin-film Polarizers, • AR coated lenses and windows, • Non-polarizing beamsplitters.
