## Description

The company was founded in 2002 by two Icelandic entrepreneurs Orri Wilberg and Sigurður Ólafsson. After working with passion and devotion in the hardwood flooring industry for decades, Orri and Sigurður decided to start their own production by founding a hardwood flooring factory in the heart of Europe, Lithuania, producing exclusive wooden floors and parquet for the Scandinavian market. Later on as talented engineers joined their team, they established the production of prefabricated wooden element houses followed by finished bathroom modules, now producing for more than 12 years.

---

## Business Line
