Description

JSC Rho nano (UAB "Rho nano") brings innovative nanotechnology products through its unique patented manufacturing method. Nanoparticles can be prepared in the solvent of your choice due to versatile technology. Impurity free, small size (1-10 nm) and low polydispersity nanoparticles and their products can be tailored for individual clients to suit their specifications. Applications of our products span across a wide range of industries including textiles, medical devices, material purification, catalysis, automobiles and printed electronics. The company is led by experienced business, marketing and scientific staff. Products: ● Silver based antibacterial nanoparticle suspensions; ● Silver nanoparticle based conductive inks for printed electronics;
