## Description

Xplicity is a software development company based in Lithuania. We equip our clients with software tools TODAY for the smart tomorrow. Since 2004 our results-driven team by offering technological strengths such as C# (.NET), PHP, Java, Angular, React, Azure, AWS, has helped numerous small to medium-sized companies around the world bring their visions to life. With a vision to revolutionize the way software development works for our clients, we at Xplicity are striving hard to deliver the quality above expected in a timely manner through effective and productive communication. At the same time offering a long-term oriented collaboration based on human touch and trust.

---

## Business Line

Custom Software development

---

## List of products

We develop Web, Desktop, and Mobile Apps for any kind of business worldwide. We can start a project from a sketch and develop it till the final version, or join at some certain moment and become the development team's reinforcement.
