Description

DR KLINIKA is a plastic reconstructive surgery and regenerative medicine clinic, established in 2008. We combine sound experience and expertise of over 30 years of practice, display of high standards of ethics, as well as full personalisation of services. DR KLINIKA provides medical treatments in the following areas : plastic reconstructive surgery, orthopedics and traumatology, oral and maxillofacial, abdominal surgery. In partnership with scientific partners, we deliver innovative treatments, developed by our scientific partners, using patients' own tissues and cells in the GMP and ATMP manufacturing processes. The treatments are carried out using the most advanced technologies for somatic cell therapy in a responsible and ethical way, complying with safety regulations and adhering to the latest international scientific standards. Areas of scientific interest: tissue regeneration, cancer.
