Description

jot.jot is a venture of a professional who founded the company with a clear desire to rally the outstanding and the ingenious – ideas and designers. And the result of his endeavour is precisely just that. Circulation of quality interior items for the contemporary design solutions. The brand name jot.jot is derived from a word “jot” which as a verb means quickly writing something down and as a noun stands for an amount equal to fraction, particle or hint. Double jot signifies the creativity and assurance in jotting the sketch down. It also symbolises the ideas and values the company endorses: simplicity and exclusiveness, exactness and imagination.

Business Line

Furniture
