Description

production and repair of piping systems and pipe works of high-pressure hydraulic systems; repair and cleaning of heat exchangers using ultrasonic cleaning technology; production of heat exchangers; repair of boilers, chemical and mechanical cleaning; repair, testing and regulation of different valves; supply of materials and parts insulation / cladding complete packages for piping installation (clamps, fasteners, gaskets and etc.) manufacturing of vapour recovery modules

Business Line

piping spools

List of products

piping spools, various process equipment modular skids hydraulic vapour recovery modules heat exchangers
