Description

NP5 was founded in 2008 years is a group of companies operating in Lithuania and the Netherlands. The group consists of building design, construction and manufacturing companies. In 2019, the company has started building a factory for innovative light steel frame products. Our main business areas are house projects, construction and manufacturing prefabricated modular light frame steel houses and other buildings. A Lithuanian company aims to be a trend-setting company in the field of light gauge steel framing (LGSF) technology. We project and manufacture residential, non-residential houses, warehouses, industrial and commercial buildings, bathhouses. The company is a reliable partner. Locally we are known for our top-quality construction projects implemented in all Lithuanian cities. Internationally we are making a name for ourselves as a manufacturer of revolutionary LGSF houses (light gauge steel framing).
