Description

Our strength is a team with 20 years of experience in the field of industrial and energy projects. The mission of TEC Consulting is to help you find the best solutions before, during and after construction, to manage the project in a responsible manner in order to complete the construction at the agreed time. We have gained extensive experience in the following areas: Energy (non-renewable, renewable and nuclear), Industry, Transport and infrastructure, Environmental protection, Water supply and sewage treatment. TEC Consulting UAB is a part of the TEC group of companies operating in infrastructure, industry and energy design, consulting and project management. The group has 94 employees, 70 of which are qualified engineers. A member of the group TEC Industry provides design and project implementation services, TEC Infrastructure – design and maintenance services in the field of transport infrastructure.

Business Line

Team with 20 years of experience in the field of industrial, energy, infrastructure projects
