Description

Np5 Construction was founded in 2013 year and specializes in manufacture of Light Gauge Steel Framing (LGSF) buildings. LGSF is a leading construction technology based on recent developments in the field of science and technology, applicable in construction. In 2019, the company has started building a factory for innovative light steel frame products. Our main business area is a manufacture of prefabricated modular light frame steel houses and other buildings. Np5 Construction aims to be a trend-setting company in the field of light gauge steel framing technology. We project and manufacture residential, non-residential houses, warehouses, industrial and commercial buildings, bathhouses. The company is a reliable partner. Locally we are known for our top-quality construction projects implemented in all Lithuanian cities. Internationally we are making a name for ourselves as a manufacturer of revolutionary LGSF houses.
