**Description**

MB Rugaitis was established in 2017. The same year the company created the brand BioFlame. Startup BioFlame has created unique wood pallets heating technology and BioFlame is looking for new solutions to use wood pallets on different heating systems. In 2018, MB Rugaitis has expanded its manufactured products and started to produce stainless steelboilers for tubs and pools. The company also created new technology of fully integrated pellet heated tub. MB Rugaitis is currently cooperating with one of the largest hot tub and saunas exporters in Lithuania. This company expands its activities. MB Rugaitis enterprise also creates and manufactures different products of stainless steel and steel (e. g. parcel mailboxes, trash can boxes, balcony railings, etc.). MB Rugaitis is innovative company that develops new products. This company is always looking for new uses for stainless steel and steel.
