Description

ORIVEGO offers healthy food for active people - from everyday health-conscious to professional athletes. We aim to make and deliver fresh and tasty, always at-hand nutrition options. We believe tasty can also be good - both for you and for the environment. Our nut butter is 100% vegan, natural, and certified organic, offered in environmentally conscious packaging solutions. Our commitment to the environment extends in our production, where we work with local farmers by repurposing all of our organic waste. UAB "ORIVEGA", based in Lithuania, is one of the leading nut processing companies in the Baltic states. We can be your organic peanut butter producer. ORIVEGO is operating its own BIO-Organic certified facility. We carefully select our nuts and peanuts from reliable sources around the world, and control the full production cycle from roasting, sorting, grinding to filling and labeling.
