Description

UAB Metaltema is a newly established company providing metal processing services: metal cutting, drilling, bending and welding. Long-term experience of a production manager in the field of mass production allows to make the most optimal decisions in production, which reduces time and costs. Many years of experience in the production of metal structures, load-bearing structures, ship hulls, allows us to make the most suitable decisions for further use of the structure. Ability to apply welding procedures by a welded method using welding procedures 131, 135, 136, 111, 141 steel, aluminum and stainless steel. The production manager reads the drawings well and draws them using a 3D program. The main goal of the company is to provide high quality, inexpensive metal processing and welding services. Contact us - we will help you.
