**Description**

New Zealand based UBCO was founded on the idea of a rugged Utility Electric Vehicle (UEV) that would transform the way people ride, work and play. UBCO has rapidly developed into a digitally connected UEV platform. Leveraging the benefits of modern electric drive and battery technology, UBCO's platform includes on and off-road transport (2x2), portable power, accessories, and subscription software. UBCO provides a complete solution, from an individual user to a fleet manager across a wide range of applications. Whether you are working in farm, exploring our planet, saving our parks, delivering goods, UBCO wants to 'power your purpose'.
