Description

The main activity of the company Agrospelta is trading in agricultural commodities. The company buys the crop of rapeseed, wheat, barley and other cereals from the local growers. Fast and responsible determination of crop quality is performed and supervised in our elevators using modern equipment and technologies; the crop is prepared to meet the international quality requirements and customers needs. The company Agrospelta trades with Lithuanian and foreign buyers and processors of the crop. Our virtues are simplicity, openness, flexibility and care.

Business Line

Agricultural commodities
