## Description

AeroMetPro has been established in 2016. A young, but very successfully launched company, that specialises in aviation metalworking industry. Our company works with custom or client brought blueprints. We work on single individual and mass production projects with private individuals and businesses. Our specialist teams have developed highest quality EU standard expertise in aircraft wheel and break MRO. We work with commercial and corporate aircrafts. Impeccable business reputation has been built by the highest qualification employees – highly skilled professionals that are not afraid of complex and precision asking tasks. Our team is determined to work effectively and adopt the most rational decision while working with complex tasks and solving problems. We specialise in: Aviation metal welding Threading Grinding Polishing Milling Drilling Heat-treatment
