Description

Amid growing IT needs at companies and organizations, the Novian group acts as an integrator, providing software, IT infrastructure, digitization, integrated solutions and related services. For clients that means no matter which group company they turn to, they will be provided with a package of services tailored to their needs. Working out of all the Baltic countries and Norway, Moldova, and Rwanda the group's companies serve clients and carry out projects all over the world. In 2018-2022 they had projects in almost 50 countries – from Europe to Africa, Asia and the America. Novian companies undertake projects in the areas of business, e-governance, e-health, and tax administration. The priorities of the group are to focus on developing expertise in areas such as high-performance computing devices, digital transformation, big data, and artificial intelligence. The Novian group's companies employ more than 250 professionals. The Novian group of businesses is owned by INVL Technology.

Business Line
