Description

Divaks was founded in 2020 in Vilnius, Lithuania. Our company is developing tailor-made, high-quality ingredients derived from insects for the pets, plants and food industry. We are developing fully automated vertically integrated technology, which helps us to breed and rear our insects on an industrial scale in the most sustainable way. Our unique and innovative processing technique allows us to convert insects into high quality, nutritious and functional ingredients. Divaks' products range is available in powdered, textured and liquid form and can be used in many different applications - from protein fortification in all kinds of foods to meat substitutes production.

Business Line

Insect protein ingredients for the food industry

List of products

Whole insect powder (WIP); Defatted insect powder (DIP); Insect protein concentrate (IPC); Textured insect protein (TIP); Insect oil.
