Description

Iterato specializes in software development, integration, maintenance, and product development. With a decade of successful experience, we have established a strong track record of collaboration with major telecommunications companies in the Baltic region, including Tele2 and Telia. Our core expertise encompasses the creation of tailor-made applications, integration solutions, process automation, and legacy modernization. In addition to our services in application development, we have a track record in product development. At Iterato, we possess the expertise and knowledge to guide your product from conception to Minimum Viable Product (MVP) and beyond. Our cross-functional team, comprising more than 40 specialists, excels in various domains, including UX/UI Design, Front-end Development, Back-end Development, DevOps, Quality Assurance, Product and Project Management, and Business Analysis. Our technical prowess extends to a wide range of technologies and platforms, such as PHP, Symfony, JavaScript, Vue.js, Vuetify, MySQL, MongoDB, IoT technologies, Docker, Kubernetes, RabbitMQ, and others. With our commitment to excellence, Iterato delivers high-quality solutions that meet the diverse needs of our clients.

Business Line
