Description

PI Lithuanian Agricultural Advisory Service, founded on 1 June, 1993, has been developing a nationwide agricultural advisory system for the third decade. The headquarters of the Lithuanian Agricultural Advisory Service is located in the township of Akademija (Kėdainiai District). Currently, more than 400 employees work in 46 district and municipal offices. They provide clients with complex accounting, business economy, crop production, animal husbandry, forestry, smart/precision agriculture, soil and water analyses, work safety and fire safety services, consult and train in the mentioned areas. Annually, we provide services for more than 14 thousand clients. The Advisory Service closely works with Agricultural Science Institutes and Universities, National farmers organizations, private companies and Governmental institutions. The Advisory Service are publishing the latest agribusiness news at www.agroakademija.lt, www.manoukis.lt and in a monthly magazine „Mano ūkis“
