## Description

Here in Electronic lab we design & develop advanced B2C and B2B custom-made e-shops since 2007. Everyday we work with more than 30 successful and growing online trading platforms which are localised in 5 countries and all together makes more than 40M euros annual turnover in online sales. Our main goal is to take our client's businesses ahead of competition by continuously upgrading their e-commerce platforms.

---

## Business Line

Web development for eCommerce

---

## List of products

Consulting; UX/UI design; E-commerce platform; Custom programming; Hosting.
