Description

Ondato is a tech company that streamlines KYC and AML-related processes. Ondato provides technological solutions such as digital identity verification, business customer onboarding, data validation, authentication, and more. These provide the highest standard available of KYC online or offline on-boarding for all business and customer types, orchestrated from a single interface. Ondato is turning compliance into a business benefit for its customers, helping to create a better and safer environment for organizations and individuals.

Business Line

Ondato is a tech company that streamlines KYC and AML-related processes.
