## Description

We specialize in data modeling using Linked Data technology and have 5+years of experience in the field. Our main product is Graphity Linked Data Platform which is applicable for companies and organisations which hold various data sources and have a need to unify their data into one system and publish it online for their own or public use. We have previously worked with modeling, integrating and publishing data of semiconductor (<http://www.nxp.com/>), refrigeration (<http://www.beijerref.com/>), media companies (<http://heltnormalt.dk/>), as well as libraries (<http://en.statsbiblioteket.dk/>). We are aiming at industries which have a wide range of products, content, indexing systems, archives etc. Our team is based in Kaunas, Lithuania, and in Copenhagen, Denmark.
