Description

Company Eco Solo is a grower of Red Californian worms - Eisenia Fetida and producer of peat substrates based on biohumus (organic soil improver). We have Californian worms for sale and also we are offering natural, professionally prepared, enriched with the nutritional supplements and microelements, pH balanced substrates. They may be used for growing seeds or sprouts of various fruits, vegetables, flowers, ornamental plants. We can prepare peat substrates/growing media by our formula or individual soil mixes by clients receipt in any size of packing. With our products you will reach maximum harvest and the highest quality of plants. Professional substrates and individual products ECO SOLO – Offered by nature
