Description

PAKA develops and produces unique packaging for your business! • The company has been in operation since 1989 • Industrial area is > 1000 m² • Design and manufacture of moulds • Production runs from 1 pc to a few million A major part of the products are developed and manufactured by custom ordering. We offer a wide spectrum of plastic packaging: • Containers • Lids • Blisters (transparent caps) • Shells • Transparent boxes – Skypacks • Cylinders • Plastic molds • Molds The main piece of PAKA equipment is the thermoforming machines. We have equipment of various sizes and capacities which allows us to manufacture batches from 1 pc to a few million. We use only the raw materials that meet the highest European quality standards. Packages are molded both from the traditional plastic and from multi-layers – PP, APET, PS, OPS, PVC, APET/PE, APET/EVOH/PE, PP/EVOH/PP, etc. Our qualified professionals will help you to choose or they can offer a unique packaging solution to suit your needs. The optimum production prices and timely supply is ensured by our manufacturing equipment (moulds for machines) in our company's mechanical section. A high quality product is guaranteed by our qualified professionals with many years of experience. Products intended for contact with food comply with EU Regulation 10/2011. If you have a packaging idea, we will help to implement it! PAKA – unique packaging solutions
